# ASSEMBLY INSTRUCTIONS

## BEFORE YOU BEGIN

Read through the entire instructions before assembling.  
 Please check that you have all of the parts before starting assembly.  
 Assembly of the greenhouse is easier with two people.  
 Assemble the greenhouse on a dry, level surface.  
 The best way to connect rods with connectors is to twist them in, all the way. Ensure that they are fully pushed in.  
 If using a rubber mallet to help with assembly, be sure not to damage parts by using excessive force.  
 Handle parts with care.  
 The greenhouse should be installed in an area protected against high winds and wind-driven rain.

## PARTS LIST
