HHGL (ROI) Limited, D02 X576

ASSEMBLY INSTRUCTIONS

BEFORE YOU BEGIN

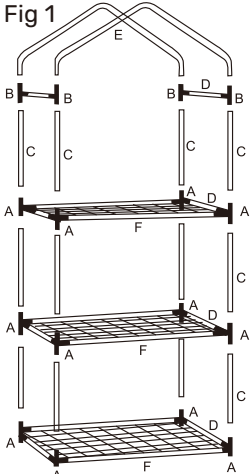

Read through the entire instructions before assembling.
 Please check that you have all of the parts before starting assembly.
 Assembly of the greenhouse is easier with two people.
 Assemble the greenhouse on a dry, level surface.
 The best way to connect rods with connectors is to twist them in, all the way. Ensure that they are fully pushed in.
 If using a rubber mallet to help with assembly, be sure not to damage parts by using excessive force.
 Handle parts with care.
 The greenhouse should be installed in an area protected against high winds and wind-driven rain.

PARTS LIST

PART REF.	DESCRIPTION	DIAGRAM	QTY.	PART REF.	DESCRIPTION	DIAGRAM	QTY.
A	Joiners		x 12	E	Roof tubes		x 2
B	Cross joiners		x 4	F	Shelves		x 3
C	Vertical tubes		x 12	G	PVC cover		x 1
D	Cross tubes		x 8				

1

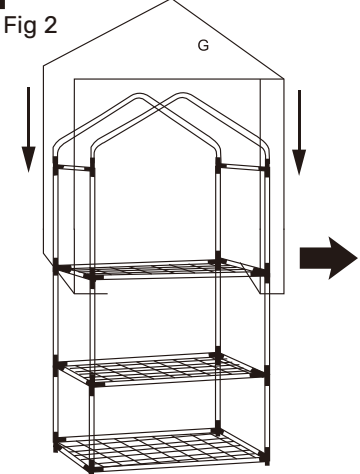

Fig 1

Start at the bottom by connecting the joiner (A) with the cross tube (D). Then insert the shelf (F). Connect the vertical tubes (C) and then repeat for the next two shelves.
 At the top of the greenhouse, insert the cross joiner (B) into the top of the vertical tube (C) and then the cross tube (D). The roof tubes (E) can then be inserted into the top of the cross joiners (B).

2

Fig 2

Complete your greenhouse by sliding the cover over the top of the frame.
 Secure the cover to the frame with the ties at the bottom.

3

Your greenhouse is now ready for use.
